Data Deli

Data is served! Check out the menu of topics and skills we can "feed" you via consultations, presentations and workshops.

RDS Menu

SPECIAL SELECTIONS

REPRODUCIBLE OPEN SCIENCE | 60

Learn about open science including a mix of key concepts and applications to enhance transparency, replicability and reproducibility in research. Topped with extra bits of FAIR and CARE principles.
DATA MANAGEMENT PLANS | 60

An introduction to funder and publisher requirements with tips for better compliance (add a DMPTool demo for a perfect harmonization).

DATA PUBLICATION & PRESERVATION | 60

A fusion of both disciplinary and domain agnostic repository options to self-archive data, along with some tips to improve data findability, acessibility, interoperability and reusability.

DATA TYPES & METADATA | 60

A variety of data types and metadata schema, including a description of data lifecycle and the importance of managing data.

Bon Appetit!
